

Framework of the Situation Analysis for Sex Workers and Clients

I. Definition: Four main categories will be included in the situation analysis i.e. female sex workers; male sex workers (serve female clients); male sex workers (serve male clients); and clients. Detail sub-categories of the sex work industry will be needed.

II. Demographic profile of SWC with HIV/AIDS/ STD:

- Size of the population under studied;
- Age;
- Ethnicity of SWC
- Marital status;
- Occupation;
- Infection rate of the partners of the SW

III. Behavioural profile of SWC

- Sex behaviour;
- Condom use;
- Drug taking;
- Relationship of police harrasment/ rate of prosecution and vulnerability to HIV/AIDS infection;
- Apparatus for safer sex.

IV. Service Inventory

- Safer sex awareness building;
- Testing service;
- Counseling service;
- Health service.

V. Information gap

VI. Conclusion /Recommendation

(note: it was emphazed by a member that even there is no available research data, it would be important to list out information about various types of sex industry, gender composition, working conditions and characteristics. This will provide a good reference for future working direction.)
